

Teaching team

Instructor

Kat Husar (she/her) - Hi everyone! I am a second year PhD student at the Department of Statistical Science at Duke University working with professors [Alex Volfovsky](#) and [Fan Li](#). My research interest lies in causal inference.

Prior to starting at Duke, I completed my undergraduate degree at The Ohio State University majoring in mathematics and data analytics.

During my free time, I like to go on walks, hang out with my friends, bake, and spend time with my cat.
